

Basic Characteristics of a Fully Developed Honors Program

Although no single or definitive honors program model can or should be superimposed on all types of institutions, the National Collegiate Honors Council has identified a number of best practices that are common to successful and fully developed honors programs.

1. The honors program offers carefully designed educational experiences that meet the needs and abilities of the undergraduate students it serves. A clearly articulated set of admission criteria (e.g., GPA, SAT score, a written essay, satisfactory progress, etc.) identifies the targeted student population served by the honors program. The program clearly specifies the requirements needed for retention and satisfactory completion.
2. The program has a clear mandate from the institution's administration in the form of a mission statement or charter document that includes the objectives and responsibilities of honors and defines the place of honors in the administrative and academic structure of the institution. The statement ensures the permanence and stability of honors by guaranteeing that adequate infrastructure resources, including an appropriate budget as well as appropriate faculty, staff, and administrative support when necessary, are allocated to honors so that the program avoids dependence on the good will and energy of particular faculty members or administrators for survival. In other words, the program is fully institutionalized (like comparable units on campus) so that it can build a lasting tradition of excellence.
3. The honors director reports to the chief academic officer of the institution.
4. The honors curriculum, established in harmony with the mission statement, meets the needs of the students in the program and features special courses, seminars, colloquia, experiential learning opportunities, undergraduate research opportunities, or other independent-study options.
5. The program requirements constitute a substantial portion of the participants' undergraduate work, typically 20% to 25% of the total course work and certainly no less than 15%.
6. The curriculum of the program is designed so that honors requirements can, when appropriate, also satisfy general education requirements, major or disciplinary requirements, and preprofessional or professional training requirements.
7. The program provides a locus of visible and highly reputed standards and models of excellence for students and faculty across the campus.
8. The criteria for selection of honors faculty include exceptional teaching skills, the ability to provide intellectual leadership and mentoring for able students, and support for the mission of honors education.

9. The program is located in suitable, preferably prominent, quarters on campus that provide both access for the students and a focal point for honors activity. Those accommodations include space for honors administrative, faculty, and support staff functions as appropriate. They may include space for an honors lounge, library, reading rooms, and computer facilities. If the honors program has a significant residential component, the honors housing and residential life functions are designed to meet the academic and social needs of honors students.
10. The program has a standing committee or council of faculty members that works with the director or other administrative officer and is involved in honors curriculum, governance, policy, development, and evaluation deliberations. The composition of that group represents the colleges and/or departments served by the program and also elicits support for the program from across the campus.
11. Honors students are assured a voice in the governance and direction of the honors program. This can be achieved through a student committee that conducts its business with as much autonomy as possible but works in collaboration with the administration and faculty to maintain excellence in the program. Honors students are included in governance, serving on the advisory/policy committee as well as constituting the group that governs the student association.
12. Honors students receive honors-related academic advising from qualified faculty and/or staff.
13. The program serves as a laboratory within which faculty feel welcome to experiment with new subjects, approaches, and pedagogies. When proven successful, such efforts in curriculum and pedagogical development can serve as prototypes for initiatives that can become institutionalized across the campus.
14. The program regularly assesses and evaluates program goals and learning outcomes as articulated in the National Collegiate Honors Council's *Definition of Honors Education* and modes of honors learning, and as appropriate to the institution's culture and mission.
15. The program emphasizes active learning and participatory education by offering opportunities for students to participate in regional and national conferences, Honors Semesters, international programs, community service, internships, undergraduate research, and other types of experiential education.
16. When appropriate, two-year and four-year programs have articulation agreements by which honors graduates from two-year programs who meet previously agreed-upon requirements are accepted into four-year honors programs.
17. The program provides priority enrollment for active honors students in recognition of scheduling difficulties caused by the need to satisfy both honors and major program(s) requirements.

Approved by the NCHC Executive Committee on March 4, 1994; amended by the NCHC Board of Directors on November 23, 2007; further amended by the NCHC Board of Directors on February 19, 2010; further amended by the NCHC Board of Directors on June 19, 2014.

Basic Characteristics of a Fully Developed Honors College

The National Collegiate Honors Council has identified these best practices that are common to successful and fully developed honors colleges.

1. An honors college incorporates the relevant characteristics of a fully developed honors program.
2. The honors college exists as an equal collegiate unit within a multi-collegiate university structure.
3. The head of the honors college is a dean reporting directly to the chief academic officer of the institution and serving as a full member of the Council of Deans if one exists. The dean has a fulltime, 12-month appointment.
4. The operational and staff budgets of honors colleges provide resources at least comparable to those of other collegiate units of equivalent size.
5. The honors college exercises increased coordination and control of departmental honors where the college has emerged out of a decentralized system.
6. The honors college exercises considerable control over honors recruitment and admissions, including the appropriate size of the incoming class. Admission to the honors college may be by separate application.
7. The honors college exercises considerable control over its policies, curriculum, and selection of faculty.
8. The curriculum of the honors college offers significant course opportunities across all four years of study.
9. The curriculum of the honors college constitutes at least 20% of a student's degree program. The honors college requires an honors thesis or honors capstone project.
10. Where the home university has a significant residential component, the honors college offers substantial honors residential opportunities.
11. The distinction achieved by the completion of the honors college requirements is publically announced and recorded, and methods may include announcement at commencement ceremonies, notations on the diploma and/or the student's final transcript, or other similar actions.
12. Like other colleges within the university, the honors college may be involved in alumni affairs and development and may have an external advisory board.
13. The college regularly assesses and evaluates program goals and learning outcomes as articulated in the National Collegiate Honors Council's *Definition of Honors Education* and modes of honors learning, and as appropriate to the institution's culture and mission.
